Hill-Rom
TotalCare® Bed System
Options and Accessories

Nurse Call, Universal TV & Lighting

- Nurse call, Universal TV and Lighting built into the intermediate rails for easy patient access.

5” Urethane High Mobility Central Locking Caster System (Standard)

Receptacle

- Receptacle provides up to 12 amps of AC current to provide a convenient source of AC power for non-life support accessory devices.
- The receptacle is isolated from the bed system’s AC supply and is equipped with an independent power cord.
- Easy access at the foot end of the base frame.

6” Urethane High Mobility Central Locking Caster System (optional)

- IntelliDrive® Power Assisted Transport system for TotalCare® bed allows a single caregiver to easily transport the bed in most cases.
- Increases bed maneuverability.
- Variable speed control.
- Available as a factory-installed unit or as a field-upgrade to TotalCare® bed.

5” Twin Caster (optional)

- IntelliDrive® register Power Assisted Transport system for TotalCare® bed allows a single caregiver to easily transport the bed in most cases.
- Increases bed maneuverability.
- Variable speed control.
- Available as a factory-installed unit or as a field-upgrade to TotalCare® bed.

Accessory Receptacle

- IntelliDrive® register Power Assisted Transport system for TotalCare® bed allows a single caregiver to easily transport the bed in most cases.
- Increases bed maneuverability.
- Variable speed control.
- Available as a factory-installed unit or as a field-upgrade to TotalCare® bed.
**Standard Head and Footboard**

- The Transport Shelf provides a platform for small equipment during patient transfer and serves as a writing surface during charting.
- The shelf has a vertical load capacity of 45 lbs. (20kg).
- A caregiver can quickly install or remove the shelf in a single step.

**Transport Shelf (footboard) and Standard Headboard**

- Padded siderail covers (sold only with the Extender) with Velcro to hold in place on the head and intermediate rails offers protection to patients.
- Cut-away areas for the patient and caregiver control access.
- Extender (sold separately) helps to lengthen the siderail and provides protection to help minimize entrapment for patients identified to be at risk.
- Wipe-down surface for easy cleaning.
Hill-Rom
TotalCare® Bed System
Options and Accessories

**Infusion Support System Kit**

- product no. **K15512**
- The system includes one (P158) ISS pole and two adapters; and one (P159) off-set bar.
- The pole will support IV pumps or bags in an upright position.
- The head end of the bed has attachment points for two mobile infusion supports.

**Infusion Support System**

- product no. **ISS 158**
- ISS consists of a movable and adjustable IV pole that will support IV pumps and bags in an upright position.
- Each ISS can support one infusion pump plus two liters of fluid. Safe working load is 20 lbs. (9 kg).
- The head end of the bed has attaching points for two mobile ISS.

**Removable Telescopic IV Pole**

- product no. **P2217**
- Installs at any end of the four corners of the bed in the holes provided.
- The pole can hold up to 25 lbs. (11kg).
- To install, insert pole and rotate in a quarter-turn clock wise. Removal is reverse of installation.
**Foot Pad**

- Soft padding with Velcro attachment straps onto foot end of bed.
- Provides comfort to patient's feet while resting on footboard.
- Wipe-down fabric for easy cleaning.

---

**Set of 2 Permanent IV Poles**

- Supports up to two IV pumps plus bags.
- IV poles attached to the frame near the corners of the headboard.
- Can support up to 40lbs. (18.1 kg) of total weight.
- Retracts and folds down for storage at head of bed.

---

**Transducer Holder**

- Use of the Infusion Support System (ISS) is required to use the Transducer Holder.
- Transducer safe working load is 2.5 lbs. (1.3 kg).
Fracture Frame Adapter Brackets

- The fracture frame adapter brackets (model 1940) available from Hill-Rom will only work with the fracture frame from Texas Medical Instruments.
- The mount holes for the adapter brackets are located on the weigh frame, under the head section and the thigh section.
